Comparing Lengths of Two Objects

GRADE 1

In comparing lengths of two objects, first ensure that the comparison is made using the same measuring unit, such as centimeters (cm). The object with the bigger number is longer than the object with the smaller number.

The length of the pencil is 7 cm long while the clip is 3 cm. long. Therefore, the pencil is longer than the clip by 4 cm.

- When we measure **LENGTH**, we measure how long or short the object is.
- **CENTIMETER** is a metric unit of length, equal to one hundredth of a meter.

MAKE A PAIR

Draw a line to connect the objects of the same length.

SHORTER OR LONGER ?

Check if the object is shorter or longer than the pencil.

SCHOOL MATERIALS

Encircle school materials that are 5 centimeters long.

WHICH BOX

Put all materials that have a length of 3 cm below in box A and those that exceed 3 cm to box B.

ESTIMATING LENGTH

Draw an object that will complete every statement.

The table on the left is bigger than the table on the right.

The red stapler is smaller than the blue stapler.

The orange highlighter is longer than the pink highlighter.
