# HUNDREDS CHART

## Hundreds Chart

- It is used to determine the next number of the arithmetic sequence by referring to the chart horizontally, vertically and diagonally.
- It is a 10 by 10 grid with numbers from 1 to 100 written inside of each box of the chart as you can see in the figure below.

Observe the hundreds chart below and evaluate how the numbers were arranged.

		+1	+1	+1	+1	+1	+1	+1	+1	+1	
		↘	↘	↘	↘	↘	↘	↘	↘	↘	
+10	↙	1	2	3	4	5	6	7	8	9	10
+10	↙	11	12	13	14	15	16	17	18	19	20
+10	↙	21	22	23	24	25	26	27	28	29	30
+10	↙	31	32	33	34	35	36	37	38	39	40
+10	↙	41	42	43	44	45	46	47	48	49	50
+10	↙	51	52	53	54	55	56	57	58	59	60
+10	↙	61	62	63	64	65	66	67	68	69	70
+10	↙	71	72	73	74	75	76	77	78	79	80
+10	↙	81	82	83	84	85	86	87	88	89	90
+10	↙	91	92	93	94	95	96	97	98	99	100

As we can see on the chart, the numbers were arranged from smallest to greatest. We read the numbers from left to right starting with number 1 and ends with number 10 on the first row.

- Moreover, moving from left to right on the horizontal rows, the numbers increase by 1.
- Looking at the vertical rows, you can see that as you move one square downward, the numbers increase by 10.

## NUMBER PATTERNS

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Hundreds Chart is also useful in learning skip counting. As you can see, the highlighted numbers are all even numbers. If you were told to count by 2's you just count from 2 to 100 following the highlighted numbers from least to greatest:

**2, 4, 6, 8, 10...**

Now, Let's try to count by 3's using the hundreds chart.

As you notice the highlighted numbers, it started from 3 and ends with 99. If you were told to count by 3's, just follow the highlighted numbers from least to greatest:

**3, 6, 9, 12, 15 ...**

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

## ADDITION USING HUNDREDS CHART

In adding numbers using the hundreds chart, you should remember the following rules:

- Moving one square down is adding 10
- Moving one square to the right is adding 1

Example:  $10 + 20 = ?$

Find the number 10 in the chart.

We know that moving 1 square down means adding 10. So we need to move 2 squares downward from number 10.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Therefore, using the hundreds chart, we determined that 30 is the sum of 10 and 20

## SUBTRACTION USING HUNDREDS CHART

In subtracting numbers using the hundreds chart, you should remember the following rules:

- Moving one square up is subtracting 10
- Moving one square to left is subtracting 1

Example:  $70 - 30 = ?$

Find the number 70 in the chart.  
We know that moving 1 square up means subtracting 10. So we need to move 3 squares upward from number 70.

Therefore, subtracting 30 from 70 is equal to 40, as we can see on the hundreds chart.
