

Chapter 11: Assigning strings with repeated characters

Section 11.1: Use the String function to assign a string with n repeated characters

```
Dim lineOfHyphens As String
'Assign a string with 80 repeated hyphens
lineOfHyphens = String$(80, "-")
```

Section 11.2: Use the String and Space functions to assign an n-character string

```
Dim stringOfSpaces As String

'Assign a string with 255 repeated spaces using Space$
stringOfSpaces = Space$(255)

'Assign a string with 255 repeated spaces using String$
stringOfSpaces = String$(255, " ")
```
